- The right of any person to know what kinds of data are collected by the government entity and how that data is classified;
- The right of any person to inspect, at no charge, all public government data at reasonable times and places;
- The right of any person to have public data explained in an understandable way;
- The right of any person to get copies of public government data at a reasonable cost;
- The right of any person to an appropriate and prompt response from the government entity when exercising these rights; and

**A BRIEF OVERVIEW
OF THE
MINNESOTA GOVERNMENT DATA PRACTICES ACT**

The Minnesota Government Data Practices Act regulates the management of all government data that are created, collected, received, or released by a government entity, no matter what form the data are in, or how they are stored or used.

Briefly, the Act regulates:

- what data can be collected;
- who may see or get copies of the data;
- the classification or specific types of government data;
- the duties of government personnel in administering the Act;
- procedures for access to the data;
- procedures for classifying data as not public;
- civil penalties for violation of the Act; and
- the charging of fees for copies of government data.

Government data is either *data on individuals* or *data not on individuals*. Data on individuals are classified as either public, private, or confidential. Data not on individuals are classified as public, nonpublic, or protected nonpublic. The classification system determines how government data are handled (see chart below).

Data on Individuals	Meaning of Classification	Data Not on Individuals
Public	Available to anyone for any reason	Public
Private	Available only to the data subject and to anyone authorized by the data subject or by law to see it	Nonpublic
Confidential	Not available to the public or the data subject.	Protected Nonpublic

I. COLLECTION OF GOVERNMENT DATA

Government data is all data maintained in any recorded form by government entities, including counties. As long as data is recorded in some way by a government entity, it is government data, no matter what physical form it is in, or how it is stored or used. Government data may be stored on paper forms/records/files, in electronic form, on audio or video tape, on charts, maps, etc. Government data normally does not include mental impressions.

Official records must be kept as set forth under [Minn. Stat. § 15.17, Subd. 1](#), which requires all officers and agencies of the state, and all officers and agencies of the counties, cities, and towns to make and keep all records necessary for a full and accurate knowledge of their official activities. Requirements for collecting, creating, maintaining, storing, and disseminating data are found in Minnesota Chapter 13 and Minnesota Rules 1205.
