Mail Box Support Owner:

The Wilkin County Board of Commissioners has authorized the County Highway Department to sell and install mailbox supports along County and Township roads. It has been observed that many mailbox supports throughout the County are hazardous installations, i.e. unusually large posts, concrete supports, pieces of machinery, etc.

In a cooperative effort to upgrade mailbox supports, enhance traffic safety, and provide for more efficient snow removal, our department offers to furnish and install an approved mailbox support at a cost to you of **\$100**. The installation does not include the removal of the old support, or affixing the mailbox to the new support is the responsibility of the owner.

If this offer is acceptable, please sign this letter in the space below, including the section and Township, and the address of your residence. Attach your payment to this letter, and return it to our office at 515 South 8th Street, Breckenridge, MN 56520.

The support will be installed as time permits. Please call the County Engineers Office at 643-4772, if you have any questions. Thank you for your cooperation.
